

## Fall 2016 Newsletter Corrigenda:

1) The winner of the 2016 Wolley Dod award (*Astrotischeria solidagonifoliella*) is actually a misidentified *Mompha brevivittella* (Clemens) in the family *Momphidae*. Charley Eisman discovered the misidentification, which was then corroborated by Terry Harrison. *Mompha brevivittella* is also a new record west of Manitoba, so the Wolley Dod award to Adrian Jones and Colleen Raymond still stands with the corrected ID.

2) *Mompha brevivittella* (Clemens) should be inserted into the AB list at #224.1 and *Astrotischeria solidagonifoliella* should be scratched from the AB list.

3) The note in the AB list at #595.01 (*Ancylis floridana*) was based on a database error in [www.tortricid.net](http://www.tortricid.net). The correct name remains *Ancylis comptana*, with *A. floridana* as a synonym.
